Software is moving into the AI workspace.

Every technology shift changes where customers expect software to work.

WHY NOW

Users can now ask for an outcome.

> “Show me what matters—and let me act on it.”

01 **AI is widely available.**

02 **Simple apps are easier to build.**

03 **Every customer has a different workflow.**

Fixed screens are giving way to adaptive experiences.

WHAT AI HAS CHANGED

AI exposes what is generic.

It does not make every SaaS product obsolete.

Chegg

31%

subscriber decline YoY

Q1 2025, amid pressure that included AI search and free AI education offerings.

Jasper

Focused

instead of generic

Reduced roles and narrowed from broad AI writing to enterprise marketing.

Stack Overflow

≈12%

estimated traffic decline

Research measured the change following ChatGPT's launch.

When a feature is easy to recreate, it stops being the moat.

WHAT REMAINS VALUABLE

Customers will still pay for what AI cannot invent.

01

Trusted data

Proprietary, current, correct

02

Domain knowledge

Meaning, logic, context

03

Security + permissions

Governed access

04

Workflow fit

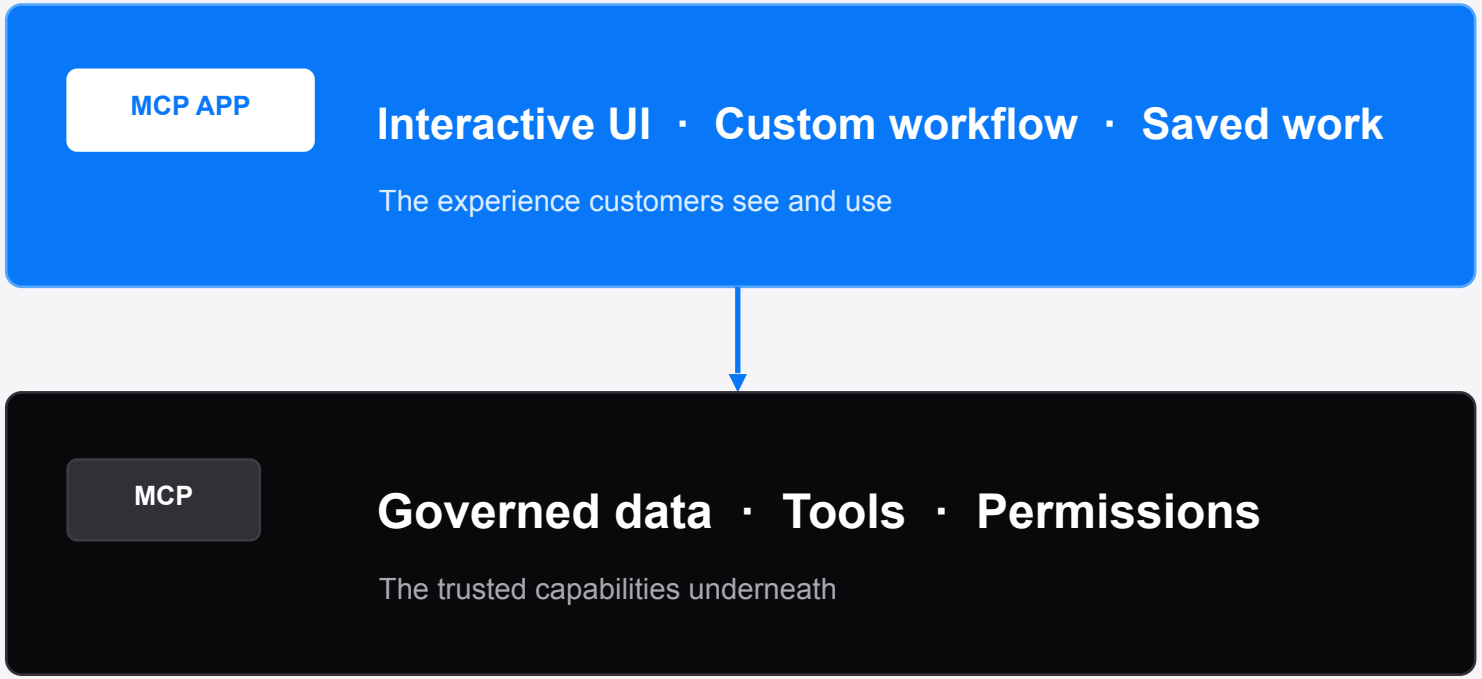

Customized to the job

The advantage is trust, context, and customization.

WHY MCP APPS

MCP is the foundation. The App is the experience.

Two layers. One customer outcome.

Together

Customer value

Ask once
Interact with the result
Keep the work

We bring our product into the user's AI workspace.

ACEio turns intent into a working experience.

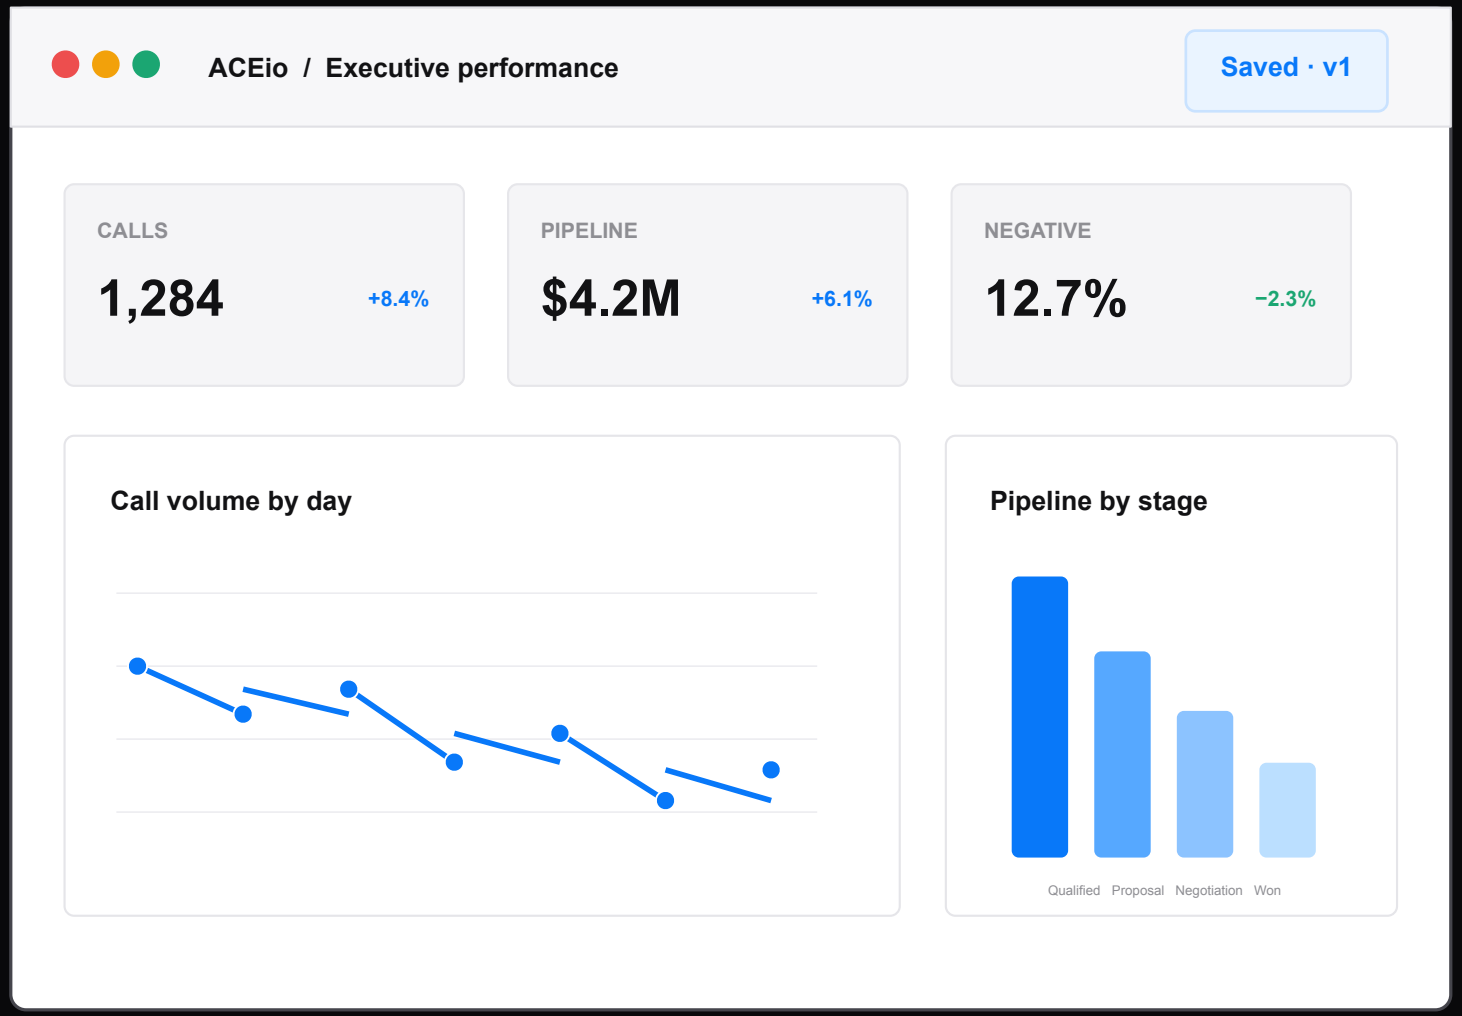

USER REQUEST

"Build me a dashboard for call performance and sales pipeline health."

Governed | Interactive | Reusable

Build · Filter · Refine · Save · Continue

Inside RingSense or through a compatible MCP host.

THE FUTURE

Bring RingSense to where customers work.

RingSense becomes a trusted, adaptive experience wherever customers choose to work.

LEADERSHIP ASK

Invest in both layers.

01 **Governed MCP foundation**

Capabilities

02 **ACEio experience layer**

Customer value

Pilot 2–3 customer workflows

Measure: time-to-insight · completion · reuse

The MCP provides the capability. ACEio turns it into customer value.
